RCVS Under Care Guidance - September 2023

New RCVS guidance requires practices to record additional information on prescriptions issued to POM-V drugs. This document outlines the changes in Teleos that have been made to accommodate these.

These changes will require an update to the program, if the options below do not appear for you please contact Teleos support and we will arrange this for you.

Active Substances

Teleos will now allow you to specify the active ingredients for a stock item. This information is then recorded along with the prescription. Items that have the same active substance can be switched in for each other on prescriptions, for situations where an item may become unavailable.

To set the active ingredients for an item, go to the stock card in the QPC where you will find the **Active Substances** button (1):

		Drug category	DOM V	loen	
Accounts category.	Stock-SA Anaesthetic/sed 912	Drug category.	POM-V	O Artin Schatzer	
Analysis category:	Oral medications 410	 Special: 		Active Substances	~
		Use net net Pricir	ng: 🗖		Add
Bar code:	2100005661638 Scan Barcode	e VPA number:			Delete
cboTrigger 🗾 💌	(none)	J	<u> </u>	, ()	
Trigger printout		AC			
Manufacturer:	(none)	 Block Urdering: Reason for Block 	.ing:	Add an active substance	
Route of admin:	HPCIA:			None	▼ +
Ordering Alt. Stock:	(none)	*		4'-Epi-doxorubicin 4-Methylpyrazole	^
Allow Automatic Pric	e Updates?: 📀 Allow Update	es C Ask Confirmation	C Do Not Update	5-FU	
Data sheet URL				- Abamectin Acarbose	
Data Dur.	<u>H</u> oldings <u>S</u> ales <u>P</u> urchases S	uppliers Batch Nos Sea	asons <u>M</u> essages Stock <u>A</u> u	dit Acemannan Acepromazine	Y
I and a second second	1		1	Acetaminophen	× .

This will open the Active Substances menu, where you can add substances from the drop-down list (2). When you have selected the specific substance you can click the **+** icon to save it to the stock item.

To make additions or alterations to the list of active substances, you can go to *Setup > Settings > Active Substances*.

Dispensing prescriptions

The prescription function has been updated to support the option to set the number of instalments for a prescription item to be used, and the frequency with which they are dispensed.

Prescription details and	output		x	
Prescription valid until	12 September 202	24 🔲 🔻		
Number of repeats/ instalments Frequency of instalment	4	months V		
Show number of repeats on printout				
Dispense	Printout	Print drug label	Produce	

These default values can be edited by altering the PRESCRIPTION command in the work entry screen (see the 'Updated PRESCRIPTION command' section below)

Updated prescription printout

This additional information is now presented on all prescription printouts:

Veterinary Prescription

Drug(s) To be dispensed (FOR ANIMAL TREATMENT ONLY / KEEP OUT OF REACH OF CHILDREN):

Quantity Details 10.00 (Ten) ACP Tablets 10mg (each)

Further repeats: No repeats for this prescription are permitted This written prescription must be fulfilled by 12 Sep 2024

Instalments: 4

Instalments to be dispensed every 3 months

Instalment No.	Dispensed by	Quantity to be dispensed
1	12/12/2023	10.00
2	12/03/2024	10.00
3	12/06/2024	10.00
4	12/09/2024	10.00

Under Veterinary Medicines regulations, substitution of a different medication over a licensed veterinary product is illegal. Drugs are prescribed under Cascade regulations.

I confirm that this animal is under my care.

12 Sep 2023

TELEOS Registration number: Date: 12 Sep 2023

Edit prescription screen

The Edit Prescription window has also been updated to reflect the new information:

Prescription - Mr Te	leos (PLAY CARD) - Bentham S	tock		Use defaul	t output op
Ar Teleos (PLAY CA	RD)	[Date	Details	Initials

				ing Mala	
				Cancel	Edit
			and the second second	11 A	

If an item has become unavailable after being prescribed, you can click **Edit** (1) to change it to another item with the same active substance. This will record an entry in the prescription history panel (2). You can also edit the number of repeats and the frequency by clicking the Edit button next to that information (3).

Updated PRESCRIPTION command

To implement these changes, the PRESCRIPTION command in the work entry screen (which tells the program to treat work added through that button as a prescription) has been updated to include extra options. These options are required for the program to show the increments. If you're unsure on how to edit this command, please contact Teleos support.

PRESCRIPTION (COPIES), (VALIDITY), (REPEATS), (FREQUENCY), (FREQUENCY UNIT) EX: PRESCRIPTION 1,12,4,3,M

In the example above, the prescription would be valid for 12 months, with 4 instalments/repeats every 3 months.

COPIES	Number of printed copies generated
VALIDITY	How long the prescription is valid for (in months)
REPEATS	Number of repeats
FREQUENCY	Number for the frequency of instalments
FREQUENCY UNIT	Determines whether the frequency is in D (days) or M (months)
